Discipline fields	Laboratories	LAMBE	LaMME	Genoscope - Metabolic Genomics	CNRGH	LGRK	SABNP	I-Stem	Généthon	ART-TG	LBEPS	IIBISC	GenHotel	Litem	Samovar
Genomics	Human / functional Genomics														
	NGS developement and computational genomics														
	Metagenomics - Genomes and environment														
	Transcriptomics / Meta-transcriptomics														
Bioinformatics and biomathematics	Bioinformatics														
	Digital sciences / AI														
	Machine Learning														
	Biostatistics														
Regenerative medicine and biotherapies for human diseases	Gene therapies - gene editing														
	Neuromuscular - Degenerative diseases														
	Genetic ageing diseases - Pathophysiology														
	Immunology														
	Bioproduction of cell and gene therapy products														
	Stem cell therapies														
Biology for health and environment	Systems biology / synthetic biology														
	Biochemistry and metabolisms														
	Structural / molecular / cell biology														
	Chemistry, biophysics														
Management sciences	Bioeconomy														
	Management of the innovation
